# CCWC app description

Below you can find a description of the official mobile app of the 11th IDBF Club Crew Dragon Boat World Championships. The app is available both on the [App Store](#) (for iPhone users) and on [Google Play](#) (for Android phone users).

## Race programme and results

The app shows you the **detailed race programme** of the selected day, so you don't need to carry around the printed version. Please **help us to save some trees** by using the mobile app! Below you can find a screenshot from the Android app. As the official race programme is not yet available at the writing of this description, (partial) data shown on the screenshot is from last year's championships. Please note that until the official race programme gets published, you will see a countdown timer instead of the race programme in the app.

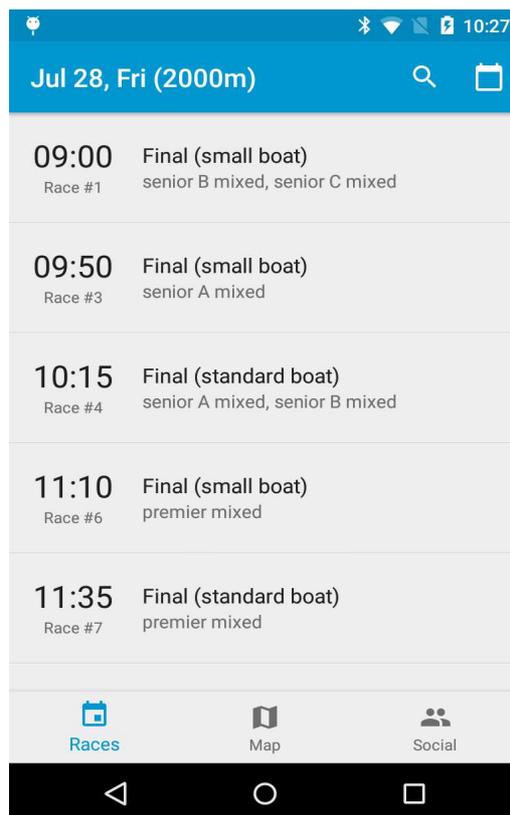

Figure 1 - Race programme (Android version)

You can **pick which day's programme** you wish to see by tapping on the calendar icon at the top right corner.

Using the search feature (by tapping on the magnifier icon at the top right corner) you can **filter the race programme** so that only the races the selected team is participating in will be shown.

C'mon,  
let's dragon  
**AGAIN!**

The list will automatically get updated during the day, so you will have your own, personalized race programme, helping you to keep track of **your team's progression**, too.

Once a race has been finished and the official **results have become available**, you will be able to see them by tapping on that race in the list. Check out the screenshot below for an example (also from last year's championships).

Figure 2 - Race results (Android version)

In case you would like to know about the results once they become available, please allow push notifications for the app and **we'll send you a message as soon as the results are official**. Push notifications will also be used for important public announcement (e.g. severe weather warning), so it worth to keep an eye on them.

## Map

Besides the race programme and the results we've also added a map to the app. It includes all the **official accommodations** of the Championships, so it **helps you to get home** as the app gives you walking directions to the selected POI (Point of Interest). Besides the accommodations, you will also find on the map the **race locations**, shared **shuttle routes**, the locations of the **bus stops** and shared shuttle **timetables**.

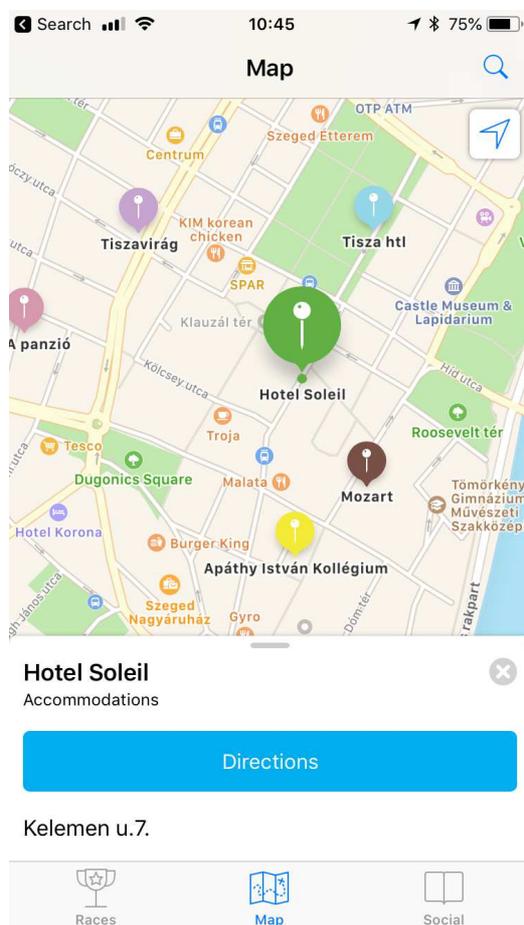

Figure 3 - Map (iOS version)

The map also has a **search** feature, helping you to find what you are looking for. Just tap on the magnifier icon to get started with search.

The **content** of the app (race programme, maps, bus routes, timetables, etc.) is **continuously and automatically updated**, you don't need to do anything to have the latest data.

Please note both the race programme and the map **requires a working internet connection**, so in case you plan to use them (unless you are from the EU and have a nice EU roaming data plan), be sure to either **get WiFi coverage** (free public WiFi is planned to be available at both race locations) or **grab a Hungarian SIM card** (quite affordable pre-paid plans are available from the three Hungarian mobile network operators: T-Mobile, Telenor and Vodafone).

## Bookmarks

The app also contains a couple of useful links. Those could be found at the “Social” screen.

C'mon,  
let's dragon  
**AGAIN!**
